# Sprint 3 Plan

Team Nodegent · Sprint Completion: May 19, 2026 · Revision 1: 05/05/26
Sprint Period: May 6 – May 19, 2026

## Sprint 3 — AI Assistant & Calendar Sync

**Goal:** Students can talk to an AI assistant that already knows their campus data and can sync their assignment deadlines and exam dates directly to Google Calendar.

## User Stories & Tasks

| Priority | ID | User Story | Story Points |
|---|---|---|---|
| 1 | **US-3.1** | As a student, I want to chat with an AI assistant inside Nodegent that already knows my courses, assignments, and schedule so that I can ask questions and get accurate, campus-aware answers.<br>- Task 1: Research AI API integration options (OpenAI/Anthropic SDK) and finalize approach<br>- Task 2: Build context aggregation service — compile user courses, assignments, and schedule into a structured AI prompt context<br>- Task 3: Implement AI chat backend endpoint with campus-aware context injection and response handling<br>- Task 4: Build chat UI component — message thread, input field, and streaming response display<br>- Task 5: Handle error states, rate limits, and loading feedback in the chat interface<br>- Task 6: Write integration tests to verify AI context accuracy against live Canvas data<br>**Total: 5 ideal hours** | 8 |
| 2 | **US-3.2** | As a student, I want to connect my Google Calendar and have Nodegent automatically create events for all my assignment due dates and exams so that I never miss a deadline.<br>- Task 1: Set up Google Calendar OAuth 2.0 scope and credential flow<br>- Task 2: Build Google Calendar API client for creating, updating, and deleting events<br>- Task 3: Build sync job to push all assignment due dates and exam events to Calendar on sign-in<br>- Task 4: Build calendar connection status UI and manual re-sync button<br>**Total: 4 ideal hours** | 5 |
| 3 | **US-3.3** | As a student, I want Nodegent to detect when new assignments are posted and notify me with a summary so that I am never caught off guard by a late addition.<br>- Task 1: Build polling service to detect newly posted assignments | 3 |

| Priority | ID | User Story | Story Points |
|---|---|---|---|
| | | since last user login<br>- Task 2: Generate notification summary and surface it as a banner on the dashboard<br>- Task 3: Add in-app notification preference toggle (enable/disable new assignment alerts)<br>**Total: 3 ideal hours** | |
| 4 | **US-3.4** | As a student, I want to choose which systems Nodegent can access (LMS, SIS, calendar) using simple on/off toggles so that I remain in control of my data at all times.<br>- Task 1: Design and build access control settings UI with on/off toggles for LMS, SIS, and Calendar<br>- Task 2: Wire toggles to backend permission model to enable or disable data fetching per source<br>**Total: 2 ideal hours** | 2 |

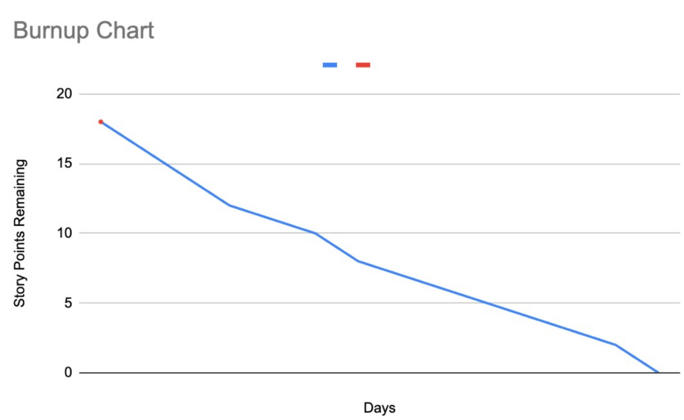
## Team Roles

Surya: Product Owner, Developer
Rafe: Developer
Josh: Developer
Niserg: Scrum Master, Developer

## Initial Task Assignment

Niserg: US-3.1 — First task: Research AI API integration options (OpenAI/Anthropic) and finalize approach
Rafe: US-3.2 — First task: Set up Google Calendar OAuth 2.0 scope and credential flow
Josh: US-3.3 — First task: Build polling service to detect newly posted assignments
Surya: US-3.4 — First task: Design and build access control settings UI with on/off toggles

## Initial Burnup Chart



## Initial Scrum Board

| User Stories | Tasks To Do | Tasks In Progress | Tasks Completed |
|---|---|---|---|
| 1 - want to chat with an AI assistant that already knows my campus data. | - Research AI SDK<br>- Build context aggregation<br>- Build chat backend endpoint<br>- Build chat UI component<br>- Handle error states<br>- Write integration tests | | |
| 2 - want to connect Google Calendar and auto-create events for deadlines. | - Set up Calendar OAuth<br>- Build Calendar API client<br>- Build sync job<br>- Build connection status UI | | |
| 3 - want to be notified when new assignments are posted. | - Build polling service<br>- Build notification summary banner<br>- Add notification preference toggle | | |
| 4 - want on/off toggles to control which systems Nodegent can access. | - Design access control settings UI<br>- Wire toggles to backend permissions | | |

## Scrum Dates

- Meeting 1: 05/07/2026, 10AM – 11AM — With TA
- Meeting 2: 05/12/2026, 2PM
- Meeting 3: 05/14/2026, 10AM – 11AM — With TA
