

Definition of Done

Project: Nodegent — CSE 115A Spring 2026

Team: Raabdulali and team

Version: 1.0

User Story Definition of Done

A user story is considered **Done** when ALL of the following criteria are met:

Functional Requirements

- ☐ All acceptance criteria listed in the user story are met
- ☐ Feature works end-to-end in the deployed environment (Vercel + Convex)
- ☐ No regressions introduced to previously working features
- ☐ Edge cases and error states are handled gracefully (no unhandled crashes)

Code Quality

- ☐ Code follows the Nodegent Style Guide
- ☐ No TypeScript errors (`npm run build` passes cleanly)
- ☐ No ESLint errors or warnings (`npm run lint` passes)
- ☐ Functions are under 50 lines; files are under 800 lines
- ☐ No hardcoded secrets, API keys, or credentials in source code
- ☐ No `console.log` or debug statements left in production code

Review

- ☐ Code has been reviewed by at least one other team member
- ☐ All review comments addressed or explicitly deferred with a note
- ☐ Branch merged into the appropriate target branch via pull request

Testing

- ☐ Feature tested manually in the browser (desktop and mobile)
- ☐ Critical user flows covered by an automated E2E test (where applicable)
- ☐ Auth, Canvas sync, and AI assistant features tested with a real UCSC account

Documentation

- ☐ `README.md` updated if the feature changes setup or usage instructions
- ☐ Any new environment variables added to `.env.example` with descriptions
- ☐ Agent actions (if any) are logged and auditable per US-4.1 requirements

Security

- ☐ No user credentials stored beyond what the story requires

- ☐ Input validated at all external API boundaries
 - ☐ Principle of least privilege applied to all new OAuth scopes or permissions
-

Sprint Definition of Done

A sprint is considered **Done** when:

- ☐ All committed user stories meet the User Story Definition of Done above
 - ☐ Sprint review demo has been conducted with stakeholders
 - ☐ Sprint retrospective has been held and action items documented
 - ☐ Sprint report is written and added to the project repository
 - ☐ main branch is in a deployable state at sprint close
-

Release Definition of Done

The release is considered **Done** when:

- ☐ All planned user stories are complete per the User Story DoD
- ☐ Release branch created from main with all documentation included
- ☐ Release Summary Document completed (user stories, known bugs, backlog)
- ☐ README reflects the final state of the product
- ☐ Final demo rehearsed and ready for project review
