

Team Working Agreement

Project: Nodegent — CSE 115A Spring 2026

Version: 1.0

1. Team Values

- **Transparency** — Blockers are surfaced early, not hidden
 - **Respect** — Everyone's time and ideas are valued
 - **Ownership** — Each person takes responsibility for their assigned work
 - **Iteration** — Ship working software early and improve over time
-

2. Communication

- Primary channel: group chat for async updates
 - Respond to messages within a day on weekdays
 - Flag blockers the same day they come up — don't wait for the next meeting
-

3. Meeting Cadence

Meeting	Frequency	Duration
Sprint Planning	Start of each sprint	~60 min
Standup	2-3x per week	~15 min
Sprint Review	End of each sprint	~30 min
Retrospective	End of each sprint	~30 min

4. Work Practices

- All work done on a feature branch — never directly on main
 - Pull requests required for merges; at least one teammate reviews
 - Commit regularly — small focused commits preferred
 - If a story is taking longer than expected, flag it within 48 hours
-

5. Code Review

- Reviews done within a day of PR submission
 - Feedback is specific and helpful — explain the why
 - Authors address comments before merging
-

6. Conflict Resolution

1. Talk it out directly first
 2. Bring it to the team if unresolved
 3. Majority vote on technical disagreements
 4. Escalate to the instructor only if truly stuck
-

Agreed upon by all team members at the start of Sprint 1.
